REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance: Claims 1-4 are allowed over the prior art of record. Current invention teaches a rotary encoder where a signal pattern of three fixed contact points of two radial shaped conductive layers are placed on a contact-point board at an angular pitch three times larger than the output pitch of the rectangular wave signal. A common pattern placed on the same board along the sliding circle of the movable contact where with one movable contact contacting one of the fixed contacts another of the movable contact makes contact with the common pattern. Claimed signal pattern and common pattern in combination with claimed encoder structure of claim 1 are neither disclosed nor suggested by the prior art of record.
2. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
